Journal of Sports Sciences, 1991, **9**, 459–462

Subject index

Accelerometry, shock absorption, jumping, stair climbing, viscoelastic insoles, dynamic loading, 137
Alkalosis, anaerobic work output, 1-km time trial, base excess, ergogenic aid, 151
Alveolar oxygen tension, breathing frequency, Cooper's test, inspiratory muscle training, maximal inspiratory pressure, maximal oxygen uptake, peak expiratory flow, 43
Anaerobic work output, 1-km time trial, base excess, ergogenic aid, alkalosis, 151
Anthropometric fractionation of body mass, densitometry, 299
Anthropometry, body composition, somatotype, body building, 23
Anthropometry, gymnasts, 53
Athletic boys, muscle fibre area, muscle fibre distribution, performance, training, 161

Base excess, ergogenic acid, alkalosis, anaerobic work output, 1-km time trial, 151
Behaviour observation, video training, remembering, coaching, quantitative analysis, 285
Bicarbonate, pH, lactate, respiratory changes, intermittent exercise, sprinting, 355
Blood lactate, excess CO_2, elite cyclists, ventilatory thresholds, 173
Body building, anthropometry, body composition, somatotype, 23
Body composition, somatotype, body building, anthropometry, 23
Body composition, somatotype, performance, female triathletes, 125
Breathing frequency, Cooper's test, inspiratory muscle training, maximal inspiratory pressure, maximal oxygen uptake, peak expiratory flow, alveolar oxygen tension, 43

Cadence, forces, impulse, effectiveness, power, cycling, 191
Caffeine, exercise and metabolism, ergogenic aids, 15
Characteristics, physical performance, injury, drop-outs, gymnastics, 259
Coaching, quantitative analysis, behaviour observation, video training, remembering, 285
Competition walking, walking, running, perceived exertion, $\dot{V}O_2$ max, 273
Cooper's test, inspiratory muscle training, maximal inspiratory pressure, maximal oxygen uptake, peak expiratory flow, alveolar oxygen tension, breathing frequency, 43
Creatine kinase, lactate dehydrogenase, plyometrics, muscle damage, drop jumps, muscle soreness, 213
Cross-country running, performance prediction, multiple regression, modelling, mood, 205
Cross-country skiing, performance, maximal oxygen uptake, upper body aerobic capacity, ski ergometer, physical fitness test, 249
Cycle ergometry, lean leg volume, regression standard, ratio standard, optimized power output, maximal exercise, 3
Cycling, cadence, forces, impulse, effectiveness, power, 191

Densitometry, anthropometric fractionation of body mass, 299
Drop jumps, muscle soreness, creatine

kinase, lactate dehydrogenase, plyometrics, muscle damage, 213
Drop-outs, gymnastics, characteristics, physical performance, injury, 259
Dynamic loading, accelerometry, shock absorption, jumping, stair climbing, viscoelastic insoles, 137

EEG, psychophysiology, preparation for performance, 313
Effectiveness, power, cycling, cadence, forces, impulse, 191
Elite cyclists, ventilatory thresholds, blood lactate, excess CO_2, 173
Ergogenic aid, alkalosis, anaerobic work output, 1-km time trial, base excess, 151
Ergogenic aids, caffeine, exercise and metabolism, 15
Excess CO_2, elite cyclists, ventilatory thresholds, blood lactate, 173
Exercise and metabolism, ergogenic aids, caffeine, 15
Exercise conditioning, males, gross efficiency, 383

Female triathletes, body composition, somatotype, performance, 125
Flooring, injury, friction, squash, 33
Forces, impulse, effectiveness, power, cycling, cadence, 191
Friction, squash, flooring, injury, 33

Gross efficiency, exercise conditioning, males, 383
Gymnastics, characteristics, physical performance, injury, drop-outs, 259
Gymnasts, anthropometry, 53

Impulse, effectiveness, power, cycling, cadence, forces, 191
Injury, drop-outs, gymnastics, characteristics, physical performance, 259
Injury, friction, squash, flooring, 33
Inspiratory muscle training, maximal inspiratory pressure, maximal oxygen uptake, peak expiratory flow, alveolar oxygen tension, breathing frequency, Cooper's test, 43
Intermittent exercise, sprinting, bicarbonate, pH, lactate, respiratory changes, 355
Intermittent exercise, sprinting, recovery, lactate, pH, 371

Jumping, stair climbing, viscoelastic insoles, dynamic loading, accelerometry, shock absorption, 137

1-km time trial, base excess, ergogenic aid, alkalosis, anaerobic work output, 151

Lactate, pH, intermittent exercise, sprinting, recovery, 371
Lactate, respiratory changes, intermittent exercise, sprinting, bicarbonate, pH, 355
Lactate dehydrogenase, plyometrics, muscle damage, drop jumps, muscle soreness, creatine kinase, 213
Lean leg volume, regression standard, ratio standard, optimized power output, maximal exercise, cycle ergometry, 3

Males, gross efficiency, exercise conditioning, 383
Maximal exercise, cycle ergometry, lean leg volume, regression standard, ratio standard, optimized power output, 3
Maximal inspiratory pressure, maximal oxygen uptake, peak expiratory flow, alveolar oxygen tension, breathing frequency, Cooper's test, inspiratory muscle training, 43
Maximal oxygen uptake, peak expiratory flow, alveolar oxygen tension, breathing frequency, Cooper's test, inspiratory muscle training, maximal inspiratory pressure, 43
Maximal oxygen uptake, upper body aerobic capacity, ski ergometer, physical fitness test, cross-country skiing, performance, 249
Modelling, mood, cross-country running, performance prediction, multiple regression, 205

Mood, cross-country running, performance prediction, multiple regression, modelling, 205
Multiple regression, modelling, mood, cross-country running, performance prediction, 205
Muscle damage, drop jumps, muscle soreness, creatine kinase, lactate dehydrogenase, plyometrics, 213
Muscle fibre area, muscle fibre distribution, performance, training, athletic boys, 161
Muscle fibre distribution, performance, training, athletic boys, muscle fibre area, 161
Muscle soreness, creatine kinase, lactate dehydrogenase, plyometrics, muscle damage, drop jumps, 213

Optimized power output, maximal exercise, cycle ergometry, lean leg volume, regression standard, ratio standard, 3

Peak expiratory flow, alveolar oxygen tension, breathing frequency, Cooper's test, inspiratory muscle training, maximal inspiratory pressure, maximal oxygen uptake, 43
Perceived exertion, $\dot{V}O_2$ max, competition walking, walking, running, 273
Performance, female triathletes, body composition, somatotype, 125
Performance, maximal oxygen uptake, upper body aerobic capacity, ski ergometer, physical fitness test, cross-country skiing, 249
Performance, training, athletic boys, muscle fibre area, muscle fibre distribution, 161
Performance prediction, multiple regression, modelling, mood, cross-country running, 205
pH, intermittent exercise, sprinting, recovery, lactate, 371
pH, lactate, respiratory changes, intermittent exercise, sprinting, bicarbonate, 355
Physical fitness test, cross-country skiing, performance, maximal oxygen uptake, upper body aerobic capacity, ski ergometer, 249
Physical performance, injury, drop-outs, gymnastics, characteristics, 259
Players' heart rates, soccer, radio telemetry, 183
Plyometrics, muscle damage, drop jumps, muscle soreness, creatine kinase, lactate dehydrogenase, 213
Power, cycling, cadence, forces, impulse, effectiveness, 191
Preparation for performance, EEG, psychophysiology, 313
Psychophysiology, preparation for performance, EEG, 313

Quantitative analysis, behaviour observation, video training, remembering, coaching, 285

Radio telemetry, players' heart rates, soccer, 183
Ratio standard, optimized power output, maximal exercise, cycle ergometry, lean leg volume, regression standard, 3
Recovery, lactate, pH, intermittent exercise, sprinting, 371
Regression standard, ratio standard, optimized power output, maximal exercise, cycle ergometry, lean leg volume, 3
Remembering, coaching, quantitative analysis, behaviour observation, video training, 285
Respiratory changes, intermittent exercise, sprinting, bicarbonate, pH, lactate, 355
Running, perceived exertion, $\dot{V}O_2$ max, competition walking, walking, 273

Shock absorption, jumping, stair climbing, viscoelastic insoles, dynamic loading, accelerometry, 137
Ski ergometer, physical fitness test, cross-country skiing, performance, maximal oxygen uptake, upper body aerobic capacity, 249

Soccer, radio telemetry, players' heart rates, 183
Somatotype, body building, anthropometry, body composition, 23
Somatotype, performance, female triathletes, body composition, 125
Sprinting, bicarbonate, pH, lactate, respiratory changes, intermittent exercise, 355
Sprinting, recovery, lactate, pH, intermittent exercise, 371
Squash, flooring, injury, friction, 33
Stair climbing, viscoelastic insoles, dynamic loading, accelerometry, shock absorption, jumping, 137

Training, athletic boys, muscle fibre area, muscle fibre distribution, performance, 161
Upper body aerobic capacity, ski ergometer, physical fitness test, cross-country skiing, performance, maximal oxygen uptake, 249

Ventilatory thresholds, blood lactate, excess CO_2, elite cyclists, 173
Video training, remembering, coaching, quantitative analysis, behaviour observation, 285
Viscoelastic insoles, dynamic loading, accelerometry, shock absorption, jumping, stair climbing, 137
$\dot{V}O_2$ max, competition walking, walking, running, perceived exertion, 273

Walking, running, perceived exertion, $\dot{V}O_2$ max, competition walking, 273
